Adept in JavaScript (React, Node.js), Spring Boot, SQL database management, backend architecture, and RESTful API integration. Seeking to apply expertise in delivering scalable, responsive solutions to drive impactful projects within a dynamic team environment.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript | React, Spring Boot, Bootstrap| MySQL Workbench

EXPERIENCE

Event Finder — LaunchCode Capstone Project

- Designed a page showing events curated by a local celebrity with details such as name, date, time, location, and images.
- Engineered robust search capabilities and precise filter functionality for event exploration, including keyword searches and category, date, and location-based filtering.
- Developed the About and Contact pages, detailing the celebrity curator administering the site and providing a contact form for public inquiries.
- Admin-created and approved user-created events and their details are efficiently stored in a MySQL relational database
- Full Project Tech Stack: React.js, Bootstrap, Spring Boot, MySQL, RESTful API, Weather API.

Web developer — Aarna Tech Solutions, India

August 2015 - November 2021

- Developed an online shopping application using MVC framework.
- Designed pages like product detail page, and order information page with JSP and JavaScript and utilized AJAX to fetch product data real-time from vendor API.
- Built internal API as backfill and real-time sync from MS SQL to Elasticsearch which improved operation efficiency.
- Developed dynamic and interactive website that ensured high traffic, page views, and User Experience, resulting in increase in sales revenue.
